

Meta 1 Solution

Puzzle: Miranda Derossi

Solution: Michael Chen

Answer: RAPIDEXIT

The first step, as normally when pictures are the only element in a puzzle, is to identify the pictures. To help with that, there are “Image Letters” which essentially means that those are all the images jumbled together. From there, the flavor text implies some sort of filtering system. Thus, each meta answer is “filtered” through the images and the letters shared in common are removed. This leaves a seemingly nonsense group of letters: **AIRPEXITD**. However, as the flavor text says “*Life's filters remove many impurities, but things can still end up in a jumble.*” (#**deep**), once the letters are anagrammed, the correct phrase **RAPIDEXIT** is revealed. Rapid...river haha.
