Piracy Solution

Puzzle: Alec Sun
Solution: Michael Chen
Answer: CYBERSCURVY

On first glance, the puzzle doesn't give you much to work with. The flavor text also doesn't appear too helpful. The most noticeable parts are the large empty speech bubble and the blank black scroll. Perhaps you can already see the near-white writing on the blank white speech bubble but can't exactly figure out what it says. The (easiest) solution is to copy the picture to paint or some other editor and fill in the blank speech bubble and scroll:

which reveals the answer as **CYBERSCURVY.** (Perhaps SCURVYCYBER gets tried first). If this puzzle seemed too simple to be in Meta 4, it totally wasn't because we didn't have a Meta 4 puzzle written.
