

-Each worm corresponds to a meta answer, fill in each joint with letters starting from the head.

-Cut out and fold the nets. (a good hint is asking if they double printed it or held it up to the light to notice the nets and the web-nets are related)

-Find which letter(s) are not “supported” by the other net/web (Which ones the line is not connected to. Hence double-sided printing is helpful, however, they can trace and it’ll work just fine). Take those, and note how many letters *are* supported.

ST(A)RS → shift A by 4 → E

DEST(I)NY → shift I by 6 → O

(T)RIANGLE → shift T by 7 → A

(C)AULIFLO(W)ERS → shift C and W by 10 → MG

OU(T)(J)UGGLED → shift T and J by 8 → BR

EOAMGBR → EMBARGO
