

Bon Voyage

ANSWER: WATCHER

Written by: Nathan James

The map shows images of influential political leaders of currently non-existent nations, with X marks nearby to confirm the general location of their territory.

The second page has 26 mash-up flags; a flag of a currently non-existent nation paired with a [naval flag code](#) blended in aspect ratio and color to match. As each naval flag code assigns a letter, the solution is extracted by taking the letters assigned by the flag codes paired with each of the flags of the nations represented on the map and “traveling” from Bolivar -> Ngo Dinh Diem, giving the answer of **WATCHER**.
