

Word Puzzle Greatest Hits

The solving of the parts is independent.

Part 1: Spinning!!!!

I hope you don't get dizzy.

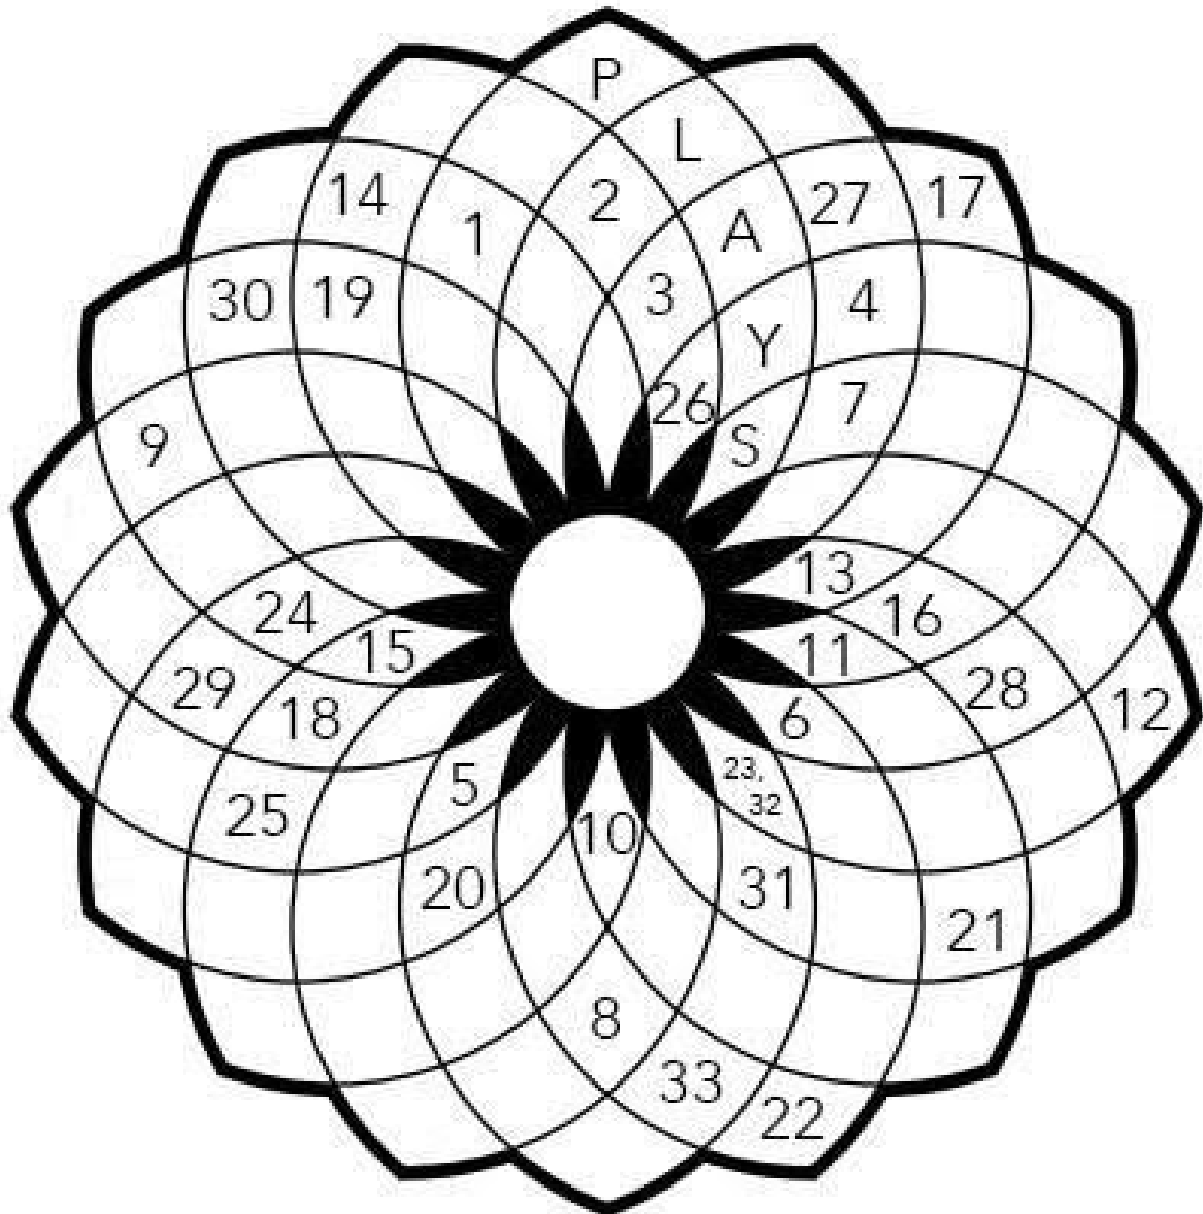

Clockwise:

Crazy from spots?
Easily confused with bacteria and infection
Greater than fam but less than species
Habitat synonym
I've got two on me and many in my Florida lawn
Insulting term for a bar maiden of old
Largest object between Jupiter and Mars
More dainty term for woman's chest
Non-Believer
Perdita's pair
Supernatural or uncanny
The sum of one's previous moral actions
Viewpoint close to the best Windows
What you would have if you had no mamas
Without its color, the Sparrow's ship
You must let green bananas _____
You need to keep up with the recent fashion _____

Counter-Clockwise:

1984 IT conglomerate
49948
A former King of Troy
Always exocrine or endocrine
Classic record material
Don't want them in my apple
If you like it you shoulda put these on it
Location esp. for concerts
Not width, length or height
People who are part of your group
Portions
Site of a forgotten war
Slightly windy, pleasantly warm
Someone who is faithful to their god is _____
The holy trinity is a form of religious _____

They hold the crackers!
Whiskers on your chin
WOW NPC apprentice found in Ammen Vale or Azuremyst Isle

Part 2: Ductionary Conundrum

Only common words! Always hit enter! Only ductionary search, no quacksaurus! Carry the ductionary with you! If there isn't a common word result, ignore the instruction! Always use absolute value like real mathematicians! Finally, remember that spaces are characters too!

1. Gather the following supplies: 6 people, six seats around a table with sliders, onelook.com and a sulking ductionary.
2. Number the chairs in clockwise order, starting with number one moving to number six
3. Have each player sit in one of the chairs, number themselves according to the number of their chair plus one and pull out their sliders.
4. Place and/or drag the sulking ductionary into the lap of player 5. If it complains, read it a few definitions and it should calm down.
5. Push in every slider that has a prime player sitting at it.
6. Move the book counter-clockwise to the next player with a slider out, that player picks the second word from D??K???
7. Assign the rest of the players words placing the nth letter of the player with the ductionary's word at the end of a word to make a word of total length $n+1$, where n is the number of that player's seat. Take the $(2*n)$ th result.
8. Any player whose word can be made from the letters of the other players' words stands. All the standing players swap seats and sit in clockwise order.
9. All Players swap the orientation of their sliders except for the player with the ductionary. That player spends the time giving the ductionary to the player they walked past halfway through their last movement.
10. Now take the first letter of each player's word and apply a caesar shift of $3*n$ to that letter where n is the indexed position of the first letter that is not in alphabetical order in the word or, if no such letter exists, the length of the word. Remove all other letters besides the shifted one, maintain length except if you have the ductionary (that player should shorten their word by 1) and take the n^2 th result.
11. Give the ductionary to the player with a non-letter in their word.
12. All players without the ductionary swap seats in order alphabetically according to the nth letter of their word where n is 1 if the slider is in and 2 if the slider is out. Start with the ductionary holding player and arrange clockwise.
13. Give the player whose is sitting in the chair with number that is $1/2$ their number the ductionary. The player who has the greatest difference between their seat and number changes their slider. The player in the seat equal to that difference also changes their slider. The player who has the ductionary sits in that player's lap, falls asleep and should not be awakened and cannot follow the instructions.
14. Each player adds n letters to the end of their word and takes the first result where n is the number of chairs they have sat in thus far.
15. The players whose words did not just change swap seats and words.
16. All this moving woke up the ductionary player. Confused as to why people played while they were gone, they delete their word and take the nth player's word where n is least difference between a player's number and that player's seat number.
17. The ductionary looks at his new player's word, finds it disgusting and runs clockwise to another player, finding the same gross word, it runs the same length and sits in that player's lap.

18. The players find the first new word, preserving length and the (n+1)th and the last letter, where n is the number of sliders out at their seat plus the number of dictionaries in their lap.
19. The players, ever fickle, find another new word, this time preserving length, the first letter and the nth letter where n is the number of the seat they are sitting in. Before searching for the first word, swap the positions of the saved letters unless they are the same letter.
20. These barely seem like words anymore. Might as well make them jibberish right? Caesar shift the time period by 0, the city by 5, the fish by 19 but only after making it plural, the smallest object by 2, the country by 4 and the surgery by 1. Select the (n)th letter of the player's word, where n is the highest number chair that player sat in.

Part 3:

That grid seems like it contains lots of information. I don't think I can access it all at once. Maybe I can start by untangling the side to side strips and end with Collins.

B	I	E	G	N	G	E	I	I	N	N	R	O	E

Bonus:

- 1 Christian branch in action
- 9 Four legged carriages
- 5 Never ceasing
- 7 Not fighting
- 2 Your clothes today are unacceptable

Penalty:

- 10 A casual
- 5 A problem that demands fornicating
- 4 Bio and physics and math...gross
- 17 Change to black and white
- 1 Count back from 3..2.....
- 9 Double toothed
- 6 Educated guesses
- 12 Elongates
- 14 Firebrands
- 12 Four Faces
- 10 His removal
- 1 I only buy Gucci and Coach
- 8 Is that an iPad Mini?
- 5 Religious object of devotion
- 15 Repeal or revoke
- 13 Rises above
- 4 Studies the smallest invaders
- 15 Switched up leads
- 12 To fix, then fix again
- 1 Ugh, I don't want those in my food
- 4 Way too over the top

Ambivalent:

- 0 Seals
- 0 Wires and Heat
