

Seek and Find

ANSWER: HUNGRY

Written by: Liam Brown

First, notice what is missing, the a's. Place them wherever there seem to be gaps. This will give you a lot of italian. Translated, the first phrase means "Look into the ditches and the map" (which later hints that you need to use coordinates as well)

You can also fill in c Trov Cer into caTrovaCer, which seems to be nonsense but is useful in a little. With the link, they see a map of hell, and if they find out that the ditches (bolge) refers to the malebolge (a layer of hell) it will narrow their search

From there, they might notice that the italian words on the compass rose are all sinners that would end up in certain ditches in the malebolge. These ditches correspond to digits. People may get stuck on whether layer 10 means 10 or zero, but in this case, it doesn't matter because...

caTrovaCer is out of order. In order to fix it, you need to shift the layers of hell

caTrovaCer = 4567890123

CercaTrova = 1234567890

1->4... etc

The sinners correspond to these levels, and convert to these numbers

7 10 -> 4 7

4 2 -> 1 9

47 19 are coordinates in hungary

If you take the A out of Hungary (like it is in the rest of the puzzle) you get **HUNGRY**
